---

Welcome to Kansas Wing CAP's online safety resources. Please browse through the links provided ( [click here](#) ) for great safety-related websites!

Pilots - Active participation in the FAA's WINGS Safety Program is highly encouraged. It will help keep you current and knowledgeable in your aviation qualifications. More information may be found at [www.faasafety.gov](http://www.faasafety.gov) .

CAP Members - If you are looking for an online monthly safety briefing, please go to CAP's eServices ( [www.capnhq.gov](http://www.capnhq.gov) ), log in, click "Safety Briefing" on the left and take one of the briefings listed. This is automatically recorded in eServices in your member safety report.
